DETAILED ACTION

1. This Office Action is the answer to the amendment received on 12/06/2005.

Status of the claims

2. Claims 2-12 are pending. Claim 1 was canceled.

Drawings

3. There are 15 figures of formal drawings, they are acceptable.

Allowable Subject Matter & Reasons for Allowance

4. Independent claim 11 is patentable over the closest references of Muramoto et al. (US Pat. 6,351,700), or Kadota because they do not anticipate nor fairly and reasonably teach an automatic clutch control device, besides other limitations, comprising:

- a clutch control means is operable for changing , in accordance with a running state of the vehicle, a speed of the connecting operation defined as extending from a beginning of the connecting operation to an end of the connecting operation.

The primary reference of Muramoto et al. discuss rotation speeds of the clutches 9, and 10; however, they do not address the speed of a clutch engaging/disengaging operation's duration.

5. Claims 2-10, and 12 are allowed because they are dependent on claim 11.

Conclusion

6. Claims 2-12 are patentable. Claims 11 and 12 are renumbered as claims 1, and 11.
